

Sami Junior Kahil

LOOKING FOR SUMMER 2021 INTERNSHIP

Internships

Software Engineer Intern, Cookiestruct Inc, Montreal

MAY 2020 – AUGUST 2020

One of 10 students selected to participate in the McGill Startup Internship Program

Project I: Design & Implement Website UI

- Advised the startup to remain on Shopify rather than going for a custom-built e-commerce website (considered cost & benefit associated with each)
- Discussed website UI requirements & functionality with the team
- Developed the website UI using **JavaScript**, **HTML/CSS/SCSS**, and Shopify's **Liquid**

Project II: Automate Tasks

- Studied web tasks & observed that creating shipping labels is tedious and repetitive
- Wrote a **Python** script with **Selenium** that automates the creation of shipping labels
- Provided a **no-coding-required & easy-to-setup ThunderBird solution** for automatically printing the shipping labels

Project III: Develop Cloud Infrastructure

- Designed a cloud infrastructure on the **Google Cloud Platform** for the startup that takes care of notifications, custom order information, email sending, & more!
- Carefully researched cloud products & compared pricing
- Implemented the infrastructure using **Google Cloud Functions** running **Python 3.7**, **Google Sheets**, and **Google Apps Script**

Personal Projects

Event App

JULY 2020 – OCTOBER 2020

Companion app for students to carry around during Frosh & Orientation Week!

- Designed an intuitive **tap-based & card-based UI** for a mobile app using Adobe XD
- Implemented the UI using **Flutter & Dart**
- Deployed the app to the web (check out my portfolio to view it!)
- Developed a **Firebase back-end** to complement the front-end

Education

Software Engineering B.Eng, McGill University, Montreal

SEPTEMBER 2018 – MAY 2022

GPA — **3.45/4.00**

Regular participator of Hackathons such as McGill CodeJam & Compete McGill
